

REIMAGINING YOUR LAB WITH

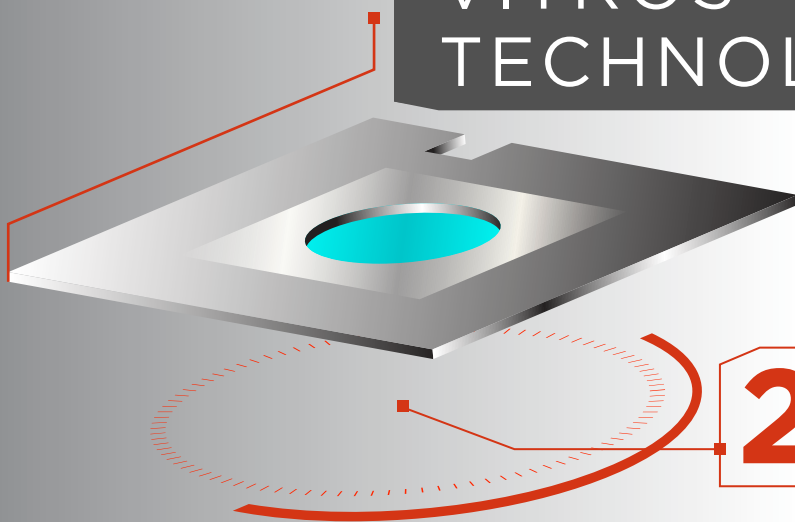

DIGITAL CHEMISTRY

70% of clinical decisions are driven by your lab and demand is rapidly increasing

NOW is the time to advance clinical labs with innovative technologies. Here's how:

Start with

VITROS® MICROSLIDE TECHNOLOGY

an entire, integrated, lab environment on a thin piece of film

2-7 MINUTE TURNAROUND TIME ON KEY PANELS

Improve quality with

DIGITAL IMAGING

enabling a much more informative view of a patient's health

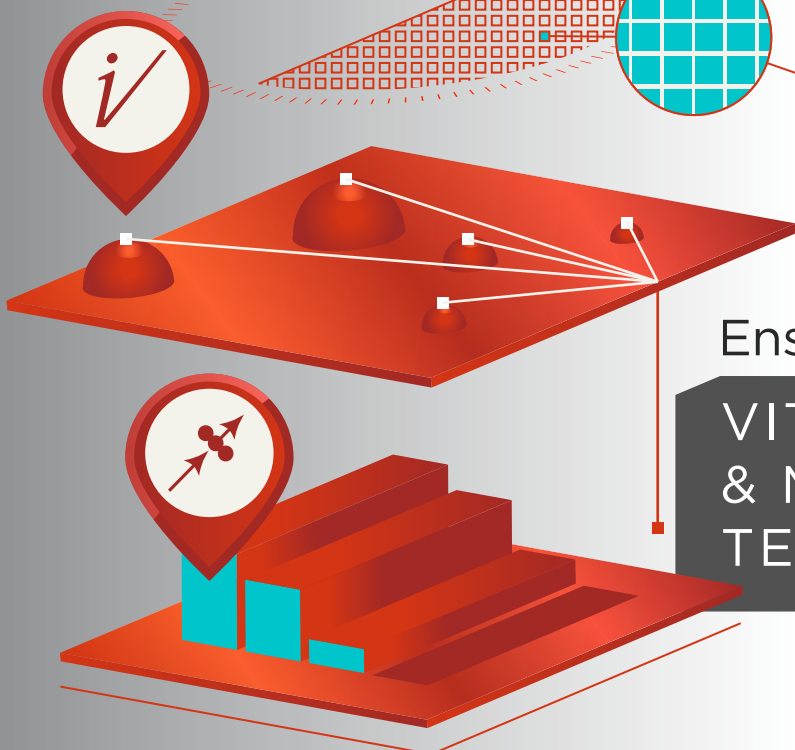

300k PIXEL DENSITY¹

¹ Imaging Reflectometer Subsystem Detailed Design, Catalogue #68697

Ensure results using

VITROS® INTELICHECK® & MICROSENSOR TECHNOLOGY

with quantitative analysis of sample integrity that reduces errors and repeat testing

96.5% FIRST PASS YIELD²

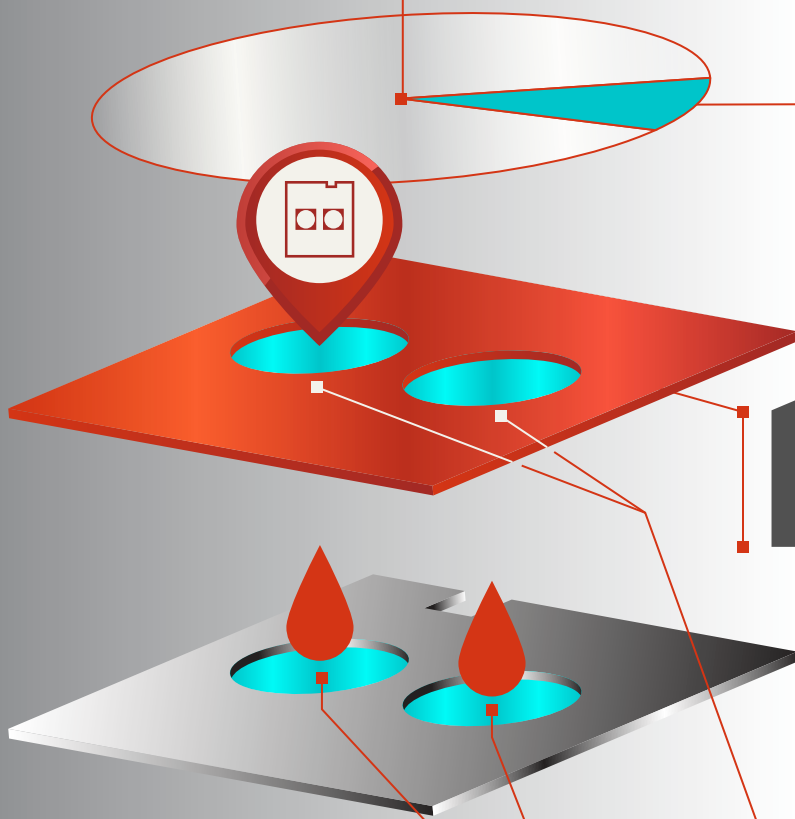

² Based on substantial performance equivalency of the VITROS® 5600 Integrated System & VITROS® XT 7600 Integrated System³

Increase throughput with

VITROS® XT MICROSLIDES*

doubles the number of tests performed on certain MicroSlides & decreases sample volume requirements

*Product in development and not currently available for sale.

3.8µL SAMPLE SIZE

X2 TESTING CAPACITY

Reimagining what's possible in today's clinical labs... and tomorrow's ³Product not currently available for sale in all countries.
