Immedicare has a positive ripple effect

NHS
an NHS Clinical Service

When care home residents receive rapid, high-quality care in a familiar environment, it reduces the risks associated with lengthy hospital stays, and reduces pressure on NHS services and budgets.[1]

Falls are the leading cause of emergency hospital admissions for older people.[2,3]

Fall

Care home resident is rushed to hospital in an ambulance.

Resident leaves care home for unfamiliar surroundings of hospital.

A&E Long delays waiting for beds increases mortality risk.[5]

Reduced number of beds available in local hospitals.[1]

Increased pressure on already strained national and local healthcare systems.[2,3]

Reduced number of ambulances available to take on other calls.[1]

Increased risk of hospital-related complications and infections such as COVID-19[1]

Reduced patient outcomes.[1]

Increased number of out-of-hours calls to GPs.[1]

Reduced workforce efficiency.[1]

Care home resident is assessed by video within their care home setting.

83% of residents stay at care home in familiar surroundings.[1]

Rapid consultation response times, with an average wait of under 2 minutes.[4]

Significantly reduced risk of hospital-related complications and infections such as COVID-19.[1]

Reduced number of emergency hospital admissions.[1]

Reduced pressure on already strained national and local healthcare systems.[1]

Increased number of ambulances available to take on other calls.[1]

Reduced number of out-of-hours calls to GPs.[1]

Improved patient outcomes.[1]

Improved workforce effiency.[1]

immedicare™
Care. Health. Life.
